IFRS16 & K3

IFRS16 & K3

Test period: 30 days

The module helps to report smoothly, easily, and above all correctly, by using Leasify's service. With a couple of simple clicks, you can obtain documents and booking orders for your accounting.

Currency conversion

Test period: 10 days

Currency conversion is an add-on module to IFRS16 & K3. With the help of this module, several IFRS reports can be converted to a common currency and provide a consolidated overview.

Merged reports

Test period: 10 days

The module helps merge several IFRS reports to a common report for total figures across your entire group.

Forecast module

Test period: 10 days

The Forecast module helps you combine your contract calculations to provide a forecast ahead, see your leasing debt and what you are expected to pay annually.

Forecast Extended

Test period: 10 days

With this extended Forecast module, you can create your own account names, color coordinate, sort them and divide leasing fees into business areas.

Bulk input

Test period: 10 days

The Bulk input module is suitable for those of you who have many leases and rental contracts to enter, and who can import several contracts in one and the same import, completely digitally and time-efficiently.

Procurement & purchasing

Test period: 30 days

Module for Procurement/Purchasing offers procurement in a simple and efficient way. Compare offers between several different suppliers that show transparency, which means you know exactly what you are paying for.

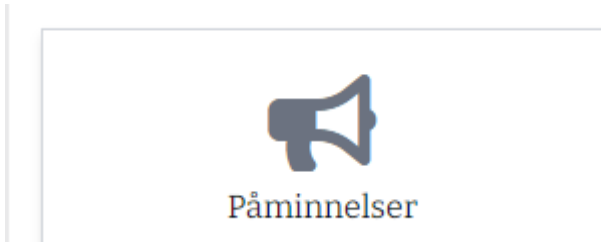

Procurement supplier

Test period: 30 days

Participate in tendering for procurements as a supplier with the option to subscribe to delivery areas in an automatic process.

Reminders

Test period: 10 days

The Reminders module helps you see the agreement's reminders in a consolidated list and also via the agreement pages in the Leasify service. The module helps you not to miss when an agreement is about to expire, you can also receive the reminders as a direct subscription in your own Outlook calendar.

Users

This is a coming function to add user licenses in the Leasify service.

Extension of contract

This is a coming function to extend the number of contracts in the Leasify service.
